

content of no less than 10%, by weight, and at least three phosphorus atom-containing units therein. --;

3. (Amended) A foam as claimed in Claim 1 wherein flame retardant (a) in the blend is either propylated or butylated triphenyl phosphate. --; and

Add the following new Claims:

Sub 21 9. (New) A polyurethane foam that contains an effective amount for flame retardancy of a flame retardant blend consisting essentially of: (a) from about 40% to about 70%, by weight of the blend, of a non-oligomeric, non-halogenated phosphate ester flame retardant; and (b) from about 30% to about 60%, by weight of the blend, of an oligomeric, non-halogenated organophosphorus flame retardant having a phosphorus content of no less than 10%, by weight, and at least three phosphorus atom-containing units therein. --;

-- 10. (New) A foam as claimed in Claim 9 wherein flame retardant (a) in the blend is a non-halogenated phosphate ester containing alkyl groups. --;

-- 11. (New) A foam as claimed in Claim 9 wherein flame retardant (a) in the blend is a non-halogenated phosphate ester containing aryl groups. --;

-- 12. (New) A foam as claimed in Claim 9 wherein flame retardant (a) in the blend is a non-halogenated phosphonate-containing composition. --;

542/ -- 13. (New) A foam as claimed in any of Claims 9-12 wherein the oligomeric organophosphorus flame retardant is an oligomeric organophosphate flame retardant in the blend of the formula:

13 where n, on a number average basis, ranges from 2 to 20, and R is selected from the group consisting of alkyl and hydroxyalkyl, and R' is alkylene.--; and

-- 14. (New) A foam as claimed in any of Claims 9-12 wherein the oligomeric organophosphorus flame retardant is an oligomeric organophosphate flame retardant in the blend of the formula:

where n, on a number average basis, ranges from 2 to 20, and R and R' are ethyl and ethylene, respectively. --.
